

Inertia Leads

In-App Help & User Guide

Step-by-step guide for the /dashboard/help page

Follow these steps in order to get from account setup to your first sent campaign and your first booked call. Each step builds on the previous one.

Master flow: Account setup -> Find leads -> Campaign setup -> Enrich -> Generate -> Send emails
OR Call leads -> Track results

Step 1 Account setup

[Profile] -> [Connect email] -> [Add card] -> [Service type]

1. **Settings** After login go to
2. Complete your profile — add your display name and save
3. **Gmail or SMTP account** — Connect your

This is the inbox your cold emails will be sent from. Gmail is recommended for best deliverability.

4. **Plan & Billing** — Go to

Add your card to activate your plan and start your 7-day free trial.

5. **service type** — Select your

Web development, SEO, digital marketing, or social media. This helps the AI write more relevant emails. Save your selection.

Important: Do not skip email warmup. Your connected Gmail account goes through a 3-week warmup period automatically. During warmup your daily sending limit increases gradually. This protects your sender reputation and ensures emails land in inbox not spam.

Step 2 Find leads

Option A — Auto find leads

[Auto find leads] -> [Enter niche] -> [Enter location] -> [Click find] -> [Campaign created]

6. **Auto find leads** Go to
from the sidebar.

7. **niche** — Enter a

for example: plumber, dentist, restaurant, gym, hair salon

8. **location** — Enter a

for example: London, Austin TX, Paris France

9. **Find leads** — Click

up to 50 local businesses are found automatically from Google Maps. Businesses with a website URL and/or phone number are included.

10. **Campaign details page** You are taken directly to the
with your leads ready.

Option B — CSV upload

[CSV upload page] -> [Format CSV] -> [Name campaign] -> [Upload] -> [Campaign created]

11. **CSV upload** Go to

from the sidebar.

12. Download the template shown on the page and format your CSV file to match the required columns exactly

13. Give your campaign a name

14. **Upload** Select your CSV file and click

15. **Campaign details page** You are taken to the
with your leads ready.

Returning user tip: If you already have a campaign go to Campaigns in the sidebar, select your campaign from the list, and you will land on the Campaign details page directly.

Step 3 Campaign details — set up before anything else

[Select timezone] -> [Enable follow-ups] -> [Save]

16. **timezone of your leads** — At the top of the Campaign details page select the
for example if your leads are in London select Europe/London. This ensures emails are sent during their business hours only.

17. **Enable follow-ups** —

toggle this on so that follow-up emails are sent automatically on day 3 and day 7 if the lead has not replied.

18. **Save** Click

before proceeding to any other step.

Do not skip this step. If you send without setting the timezone, emails may go out at 3am for your leads. Always set timezone and save first.

Step 4 Enrich, generate and send — follow this exact order

[Select leads] -> [Enrich] -> [Select leads] -> [Generate emails] -> [Select leads] -> [Send]

Step A — Enrich leads

Select all leads using the checkbox at the top. Click Enrich. The system scrapes each lead's website, analyses 30+ signals, and calculates a lead score from 0 to 100. A higher score means a bigger opportunity. Wait for enrichment to complete before proceeding.

Step B — Generate emails

Select all enriched leads. Click Generate emails. The AI reads each lead's website analysis and writes a personalized 3-email sequence for each lead. A personalized audit report showing website gaps is also generated for each lead at this stage.

Step C — Send emails

Select all leads with generated emails. Click Send emails. Emails are scheduled and sent during business hours in the timezone you selected. Follow-up emails are queued automatically for day 3 and day 7 for leads who have not replied.

Order matters. Always enrich first, then generate, then send. Generating before enriching produces generic low-quality emails. Sending before generating sends nothing.

Step 5 Check email status and manage replies

[Campaign details] -> [Outreach column] -> [View email] -> [Mark as replied]

19. **Outreach column** In the Campaign details page each lead has an showing status boxes — Pending, Sent, or Failed. Click any box to see the email details.

20. **View** Click

on any lead to see their full details and their personalized audit report.

21. **Gmail inbox regularly** Check your for replies from leads — the app does not read your inbox automatically at this stage.

22. **Mark as replied.** When a lead replies — go to their email in the sent box, open the email modal and click

This stops all further follow-ups to that lead immediately.

Critical: If you do not mark a replied lead, the system will send them follow-up emails even though they already responded. Always mark as replied the moment you see a reply in your inbox.

Step 6 Phone-only leads — call outreach and audit walkthrough

Some leads found by Inertia Leads have a phone number but no email address. These leads are not left behind. Use the phone number to make a direct cold call and walk them through their website audit report live on the call.

How to Identify Phone-Only Leads

23. **email column is empty** In the Campaign details page look for leads where the email column is empty but a phone number is shown.

24. These leads have been enriched and have a lead score — they are just as valuable as email leads

25. **View** Click

on the lead to open their full details including their website audit report before calling.

Before the Call — Prepare Using the Audit Report

Click View on the lead. Read through their website audit report carefully. Note the top 3 issues — for example: no booking system, slow page speed, no SSL, few Google reviews. These are your conversation hooks. You are not guessing their problems — you have already analysed their website.

26. **lead score** — Note their lead score. A score above 70 means major digital gaps. This is your strongest call.

27. **no booking system, slow load time, outdated website, no SSL, low Google reviews** Note the top issues flagged in the audit —

28. Have the audit report open on screen while you call so you can reference specific numbers and facts

Cold Call Script — Opening

Use this script as a guide. Adapt it naturally to the conversation. The goal of the opening is to get 60 seconds of their time and earn permission to share what you found.

Opening — get their attention

You: *Hi, is this [business name]?*

Lead: *[Yes]*

You: *Hi, my name is [your name]. I am a [web developer / SEO specialist / digital marketer]. I was doing some research on local businesses in [their area] and I ran a quick website audit*

on your site. I found a few things that could be costing you customers. Do you have 60 seconds?

If they say yes — move to the audit findings

You: *I looked at your website and I noticed [mention their top issue — for example: your site does not have an online booking system]. Businesses in your area that have this are getting significantly more bookings directly from Google. Your competitors [name one if you know it] already have this set up.*

You: *I also noticed your site loads slowly — it scored [their PageSpeed score] out of 100. Google uses page speed as a ranking factor so this is likely affecting how many people find you.*

You: *I have a full report I put together on your website. It lists every issue and exactly what needs to be fixed. Would you like me to send it over or walk you through it now?*

If they want it sent

You: *Perfect. What is the best email to send it to? I will have it over to you within the hour.*

Note their email, go to the lead in your campaign, add their email, and send the audit report email manually.

If they want to hear it now

You: *Great. So the main things I found are: [read the top 3 issues from the audit report]. Any one of these on its own could be costing you 5 to 10 new customers a month. I can fix all of this for you. The whole process takes about [your timeline]. Would it be worth a quick 15-minute call this week to go through what it would look like for your business specifically?*

Handling Common Objections

Objection	Response
I am busy right now	No problem at all. When is a better time? I can call back in 10 minutes or tomorrow morning — whatever works for you.
I already have a website person	That is great. I am not looking to replace anyone. I just found a few specific issues that are likely affecting your Google rankings right now and wanted to flag them. It would only take 5 minutes to show you.
I am not interested	No problem. Can I ask — is there a specific reason? A lot of businesses I speak to are already aware of the issues but just have not had time. I can handle everything so you do not need to do anything yourself.
How much does it cost	Great question. It depends on exactly what needs fixing. The audit is free and gives us a clear picture. Once I show you what is involved I can give you an exact number. There is no obligation at all.

Send me something by email	Absolutely. What is the best email? I will send you the full audit report I ran on your site so you can see exactly what I found. I will follow up in a couple of days to see if you had a chance to look at it.
----------------------------	--

After the Call — What to Do

29. **add it to the lead in your campaign** If they gave you their email — and send the audit report email immediately while the conversation is fresh.

30. **note the time and set a reminder.** If they agreed to a follow-up call — Go to the lead in your campaign and add a note.

31. **mark the lead accordingly** If they were not interested — so you do not call them again.

32. **follow up with a text message** If you left a voicemail — referencing the audit: "Hi, I left a voicemail earlier about a free website audit I ran on [business name]. I found a few things worth looking at. Happy to send it over if useful."

Pro tip: The audit report is your most powerful tool on a call. You are not cold calling to sell — you are calling to share a free analysis of their own business. This completely changes the dynamic. You already did the work. You already know their problems. That makes the conversation feel helpful, not salesy.

Step 7 Track hot leads — see who viewed their audit report

[**Hot leads page**] -> [**See viewers**] -> [**Track view count**] -> [**Prioritise outreach**]

33. **Hot leads** Go to from the sidebar.

34. Any lead who opened their personalized audit report appears here in real time

35. The number of times they viewed it is shown — a lead who has viewed 3 or more times is highly interested

36. Prioritise calling or personally emailing these leads — they have already seen your value and are actively considering it

Pro tip: A lead who views their audit report multiple times without replying is the perfect candidate for a direct phone call. They are interested but have not committed. One well-timed call at this moment — referencing their audit report — closes more deals than any follow-up email sequence.

Step 8 Dashboard — your stats and analytics

37. **Dashboard** Go to to see leads found today, emails sent, reply rate, and monthly usage at a glance.

- 38. Your daily email and lead limits reset at midnight in your selected timezone
- 39. Your warmup progress is shown here — check it weekly to see your daily sending cap increasing

Step 9 Growth and Agency users — connect more inboxes

40. **Settings** Go to

and connect additional Gmail or SMTP accounts.

41. **Growth plan** —

connect 2 email accounts. This spreads your daily sends across 2 inboxes for better deliverability and results.

42. **Agency plan** —

connect up to 4 email accounts for maximum volume and inbox rotation.

43. **each connected inbox regularly** Check

in Gmail. When you see a reply in any inbox — go to that lead's campaign, find the lead, open their email modal and mark as replied.

Each connected inbox goes through its own warmup period. Connect additional inboxes as early as possible so they are fully warmed up when you need the extra sending capacity.

Quick Reference — Common Questions

Question	Answer
Why are my emails not sending?	Check that your Gmail account is connected in Settings. Check that warmup is active. Check that you have enriched and generated emails before clicking send.
Why do some leads have no email?	These are phone-only leads found on Google Maps. Use their phone number and the call script in Step 6 to reach them directly.
How do I stop follow-ups to a replied lead?	Go to that lead in the campaign, open their email modal, and click Mark as replied. This stops all future follow-ups immediately.
What is a lead score?	A score from 0 to 100 based on 30+ signals from the lead's website. A score above 70 means the business has major digital gaps — highest priority to contact.
What is the audit report?	A personalized website analysis generated for each lead showing their specific issues. It is attached to every cold email and available in the View panel. Use it on calls too.

When do daily limits reset?	At midnight in the timezone you selected in your campaign settings.
What does enrichment do?	It scrapes the lead's website, runs a PageSpeed analysis, checks for 30+ signals, and calculates a lead score. It must be done before generating emails.
Why is my daily limit low?	Your email account is still in warmup. Limits increase automatically each week. Check your warmup progress on the Dashboard.
